INTRODUCTION

Professional with a strong interest in applying data science to critical sectors such as mining, aerospace, healthcare, and e-commerce. I aim to innovate in process optimization and predictive analytics by leveraging advanced artificial intelligence and data analysis techniques. Committed to continuous learning to drive strategic decisions that create significant impact on organizational efficiency and sustainability.

EDUCATION

Faculty of Physical and Mathematical Sciences, University of Chile <i>Diploma in Artificial Intelligence for Reliability and Predictive Maintenance</i>	Jun. 2025 – Present <i>Santiago, Chile</i>
Faculty of Physical and Mathematical Sciences, University of Chile <i>Master's Degree in Data Science</i>	Aug. 2021 – Aug. 2023 <i>Santiago, Chile</i>
Faculty of Economics and Business, University of Chile <i>Bachelor of Arts in Economics</i>	Mar. 2014 – Dec. 2018 <i>Santiago, Chile</i>

EXPERIENCE

Sr. Data Scientist <i>Accenture</i>	May 2024 – Present <i>Santiago, Chile</i>
- Development of Gen AI-based solutions to optimize maintenance activities in the mining industry using Microsoft Azure. - Configuration and management of CI/CD pipelines with Azure DevOps, implementing automated deployments and continuous testing to ensure quality and rapid delivery. - Development of diffusion model-based solutions for generating personalized content focused on the retail industry.	
Part-time Lecturer <i>Master's in Data Science, University of Chile</i>	Mar 2024 – Jul 2025 <i>Santiago, Chile</i>
- Lecturing practical Python courses on machine learning, LLMs, and MLOps. - Creation of teaching materials and assessments, providing constructive feedback. - Constantly updating the course with new technologies and collaborating with industry experts.	
Data Scientist <i>AB InBev</i>	Apr 2021 – Aug 2021, Jul 2023 – May 2024 <i>Santiago, Chile</i>
- Implementation of collaborative filtering-based recommendation systems to suggest products to points of sale, using Azure Databricks as the main platform. - Development and training of chatbots specialized in analyzing beer-related feedback using large language models (LLMs). - Design, training, and deployment of predictive models for beer demand forecasting, optimizing inventory management and sales strategy.	
Data Scientist <i>Futurum</i>	Nov 2020 – Mar 2021 <i>Santiago, Chile</i>
- Design and construction of ETL pipelines using Google Cloud Platform (GCP). - Conducting thorough data analysis and processing of client-provided datasets, including cleaning and optimizing data quality and usability. - Development and presentation of analytical reports to improve strategic decision-making within the organization.	
Economist <i>Ministry of Economy, Government of Chile</i>	May 2019 – Nov 2020 <i>Santiago, Chile</i>
- Conducted economic studies and prepared reports tailored to the requirements of government authorities. - Developed a Tableau dashboard to visualize the post-pandemic economic recovery. - Automated operational processes using APIs and Python.	

PROJECTS

Data Scientist

Mar 2024 – Jun 2024

CORFO Project

Online

- Implementation of a specialized health agent using Gen AI for medical treatment recommendations, integrating clinical protocols and patient databases.
- Automation of medical records and treatment plan generation using NLP and Gen AI techniques.

Data Scientist

Oct 2022 – Feb 2023

Satia

Online

- Implementation of clustering and classification models to manage complaints in the brewing industry.
- Development of a complaint classification model for the automotive industry.

PROGRAMMING SKILLS

Languages: Python, R

Databases: SQL, PySpark, MongoDB, Redis

Machine Learning Libraries: Scikit-learn, PyTorch, Hugging Face, Keras, MLflow

GenAI Libraries: LangChain, LangGraph, LangSmith

Development Tools: Git, Bash, HTML, CSS

Deployment Libraries: Docker, Gradio, Flask, FastAPI

Cloud Platforms: Databricks, Microsoft Azure, Google Cloud Platform, Amazon Web Services, Heroku

ACADEMIC ACTIVITIES

Faculty of Physical and Mathematical Sciences, University of Chile

Fall 2022 – Present

Teaching Assistant

Santiago, Chile

- Assisted in courses such as Databases and Scientific Programming Laboratory.
- Graded assessments in courses including Natural Language Processing, Introduction to Data Mining, Data Mining, Statistical Thinking, and Computational Intelligence.

Master in Business Analytics - Adolfo Ibáñez University

Spring 2020

Teaching Assistant

Santiago, Chile

- Conducted tutorials on machine learning topics and their applications in finance using Python.
- Designed practical labs to help students practice machine learning concepts.

ADDITIONAL INFORMATION

Languages

- * Spanish: Native
- * English: Fluent (*TOEFL Home Edition Score: 99*)

Social Work | *Volunteer, Tutor*

2014 – 2018

- * Volunteer in community support through social projects focused on construction and education.
- * Provided tutoring support to students from vulnerable backgrounds within the faculty.
